cltex remove TeX auxiliary/intermediate files

doc generated from the script with gendoc — bash script, version=0.02

Synopsis

```
cltex [options]
```

Options

`-h|--help`	print short help and exit
`-H|--Help`	print full documentation and exit
`-V|--version`	print version and exit
`-v|--verbose`	run verbosely
`-a|--all`	include pdf, dvi and ps files
`-d|--dryrun`	do a dry run: show what would be removed
`-r|--recursive`	remove files recursively

Description

cltex removes tex auxiliary/intermediate files for all TeX (`.tex,␣.dtx` and `.ltx`) files in the current directory. With the `--all` option, pdf, ps and dvi files are also removed. Files are removed from the given directory, the current directory by default.With the `--recursive` option, files are removed from subdirectories, too.
